

The Uni Knot

The Uni Knot is great for connecting fishing line (mono, fluoro & braid) to hooks, lures, swivels, etc. because of its' high strength and ease of tying with a little practice.

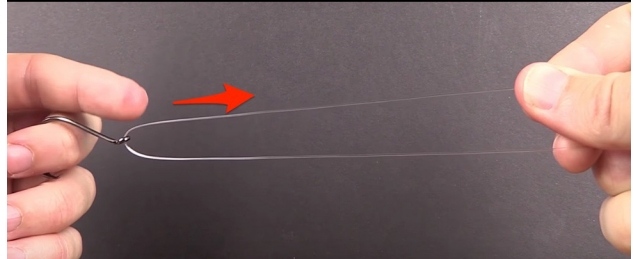

Here are the steps for tying this popular knot:

STEP 1: PULL 6 INCHES OF LINE THROUGH THE EYE OF THE HOOK

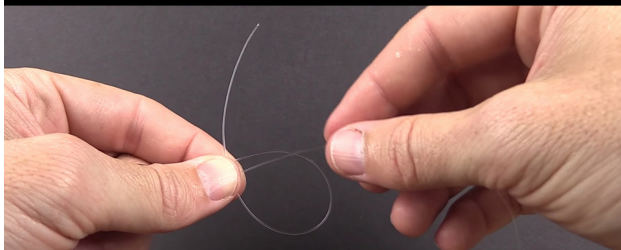

Tip: pinch the line just above the eye after pulling it through the hook eye.

STEP 2: LAY 6 INCHES OF TAG END UP THE RUNNING LINE

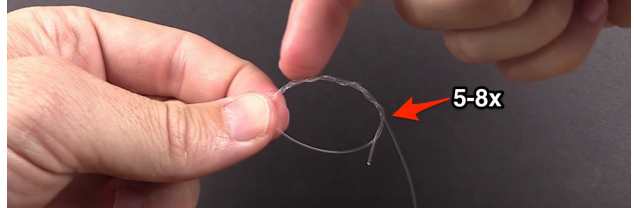

Tip: pinch the tag line and main line above the hook eye to keep them in place.

STEP 3: USE THE TAG END TO MAKE A LOOP AROUND THE MAIN LINE

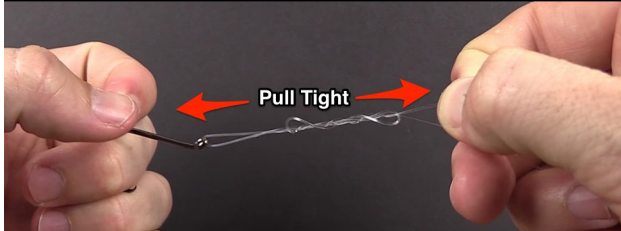

Tip: pinch the loop and main line between your thumb and index finger.

STEP 4: MAKE 5-8 WRAPS THROUGH THE LOOP YOU MADE IN STEP 3. MAKE SURE ALL YOUR WRAPS GO IN THE SAME DIRECTION UP THE LOOP

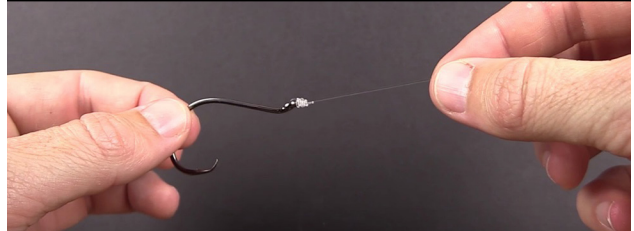

Tip: make five wraps through the loop for mono line and eight to ten wraps with braid.

STEP 5: PULL THE TAG END AND MAIN LINE FINGER TIGHT UNTIL THE KNOT SLIDES DOWN TO THE HOOK EYE

Tip: pull the tag end of line finger-tight first, then slide the knot down by pulling the main line.

STEP 6: CONTINUE PULLING THE LINE UNTIL THE KNOT FORMS INTO COILS ABOVE THE HOOK. CUT THE TAG END

Tip: wet your knot with water or saliva to make it tight. Cut the tag end. Your Uni Knot is complete.

The Double Uni Knot

The Double Uni Knot is the most popular knot for connecting two fishing lines together.

This impressive knot can be used to connect lines of different types (braid, mono & fluoro) in addition to lines of both the same or very different diameters.

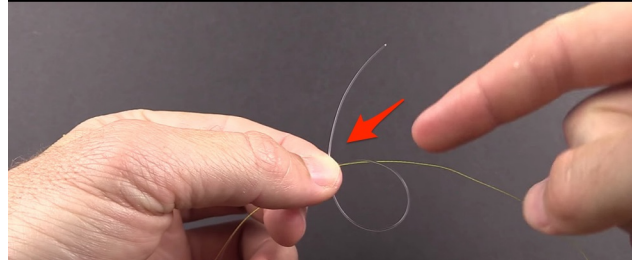

Here are the steps for tying this popular knot:

STEP 1: OVERLAP 6-10 INCHES OF LEADER AND BRAIDED LINE

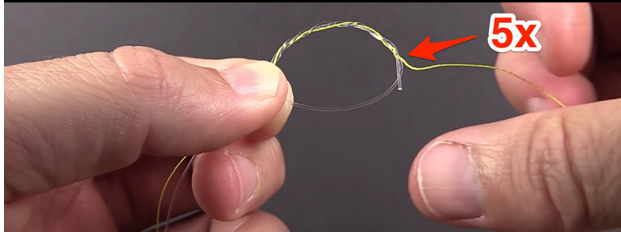

Tip: pinch the two lines in the center of the overlap.

STEP 2: MAKE A LOOP WITH YOUR LEADER AROUND THE BRAIDED LINE

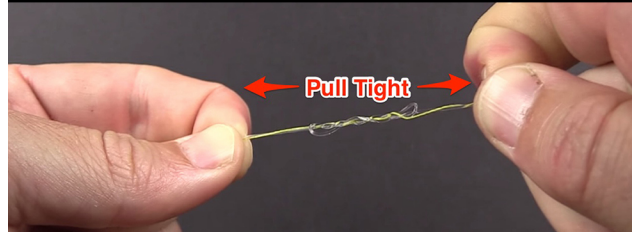

Tip: pinch the loop and braided line at the overlap point.

STEP 3: WRAP THE TAG END OF YOUR LEADER THROUGH THE LOOP YOU MADE IN THE PREVIOUS STEP 5 TIMES

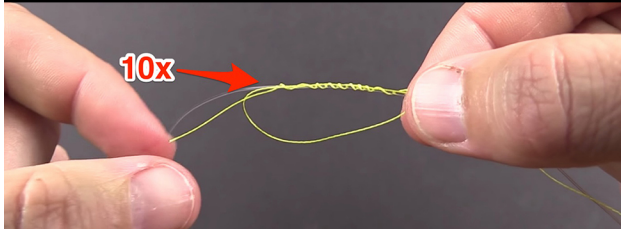

Tip: make sure all your wraps through the loop go the same direction up the line.

STEP 4: PULL EACH END OF THE LEADER LINE IN OPPOSITE DIRECTIONS TO MAKE YOUR LEADER UNI KNOT FINGER-TIGHT

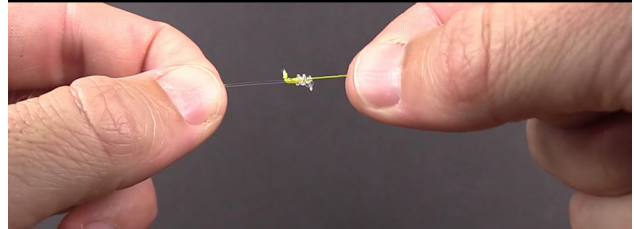

Tip: steady pressure on your leader line will make sure your knot coils correctly.

STEP 5: REPEAT STEPS 1-4 WITH YOUR BRAIDED LINE, MAKING YOUR BRAID UNI KNOT BELOW THE LEADER UNI KNOT

Tip: make 10 wraps through your braided loop instead of five.

STEP 6: PULL YOUR LEADER AND BRAIDED LINE TIGHT SO THE TWO UNI KNOTS COME TOGETHER. LET THE KNOTS COIL TOGETHER

Tip: wet your knot with water or saliva to make it tight. Cut the tag ends. Your Double Uni Knot is complete.
